mandayen.com.au

Welcome

Our 18th Bull Sale will once again be held on our Keith property at the “Eight Mile” sale complex. We put a lot of effort into finding top line genetics from Australia and overseas that display great muscling, softness, doing ability, structure, and gentle dispositions for which Mandayen genetics have become well known for.

It has been an interesting year for cow calf producers, seeing a relatively dry winter and spring in southern Australia. This has been shown in the EYCI, seeing a huge drop in cattle prices in early spring, fortunately many parts of eastern Australia have received good rain in late November, which has in turn brought prices back up to a more sustainable level.

Within our Limousin bulls, we are offering a draft of sires with the selection emphasis being on the economic traits: structural soundness, muscle, softness and docility. Sire lines include Summit Drover

P54; whose bulls are showing larger frame, very good structural soundness and are a very consistent run of bulls. Myers Western Star N19; whose bulls are showing excellent muscle patterns. Mandayen

Xtra-Loyal P149, which sons are proving to be well muscled, moderate in frame and very soft. Birubi

Jupita J15; which proving to be stout and well put together bulls.

If you would like to inspect the bulls pre-sale, we have our usual field day on Tuesday the 7th of February at our Eight Mile sale complex 365 Dark Island Well Road, Keith or inspection by appointment for your convenience.

We would like to thank our sale agents (Elders and Spence Dix and Co) for their ongoing assistance and support. If you are unable to attend on sale day and wish to purchase, we recommend contacting one of their representatives to place an order or to organise phone bidding. The auction will also be interfaced online through AuctionsPlus with videos of each lot available. We also appreciate the continued support of agents from other firms. Most importantly we would like to thank everybody who has been involved and supported our program over the years, through good and bad times. We wish all prospective purchasers the best of luck on sale day and are confident our cattle will perform for their new owners.

Damian Gommers and family
MANDAYEN LIMOUSIN & ANGUS

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES IN THIS CATALOGUE

LIMOUSIN SUFFIXES			
Trait	SUFFIX	STATUS	STATUS ARRIVED AT BY Details available for individual animals on Limousin database Animal Details page
Horn status	PP	Homozygous polled	DNA test confirmed homozygous polled, or Animal is homozygous polled by pedigree as both parents are confirmed homozygous polled, or Animal is confirmed homozygous polled by progeny analysis process.
	P	Polled	DNA test confirmed heterozygous polled, or Animal is untested, information was provided by breeder.
	Ps	Polled with Scurs	Identified by details provided by breeder at time of registration, or DNA test confirmed heterozygous polled and breeder information indicates animal shows scurs.
	H	Horned	DNA test confirmed horned, or Animal is untested, information was provided by breeder.
Coat colour	BB	Homozygous black	DNA test confirmed homozygous black, or Animal is homozygous black by pedigree as both parents are confirmed homozygous black. Animal is confirmed homozygous black by progeny analysis process.
	B	Black	DNA test confirmed heterozygous black, or Animal is untested, information provided by breeder.
	R	Red	Identified by details provided by the breeder.
	A	Apricot	Identified by details provided by the breeder.
	O	Other	Identified by details provided by the breeder.
F94L gene	AA	F94L 2 copies	DNA test confirmed animal carries 2 copies of the F94L gene, or Animal carries 2 copies of the F94L gene as both parents carry 2 copies of the F94L gene.
	AC	F94L 1 copies	DNA test confirmed animal carries 1 copy of the F94L gene.
	CC	F94L 0 copies	DNA test confirmed animal carries no copies of the F94L gene.
	U	F94L Status unknown	Animal is untested and parent status is unknown.
Lim-Flex	LF	Lim-Flex	Animal is identified as Lim-Flex by pedigree details in line with ALBS regulations.

EXPLANATION OF ESTIMATED BREEDING VALUES

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured.

EBVs are provided for the following traits:

Calving Ease Direct: estimates the differences in the ability of a sire's calves to be born unassisted from a 2-year-old heifer.

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Mature Cow Weight: estimates differences between animals in live weights of cows at 5 years of age.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

Scrotal Size: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Carcase Weight: ranks animals for carcass weight.

Eye Muscle Area: ranks animals for eye muscle area measured at the 12th rib on a 300kg carcass.

Rib Fat: ranks animals for rib fat depth at the 12th rib on a 300kg carcass.

Rump Fat: ranks animals for fat depth at the p8 site on the rump on a 300kg carcass.

Intra Muscular Fat: ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcass.

Docility: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Comparing EBVs: The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

Breed Average EBVs for 2021 Born Calves														
CED	GL	BWt	200	400	600	MCW	MLK	SS	CWT	EMA	RIB	RMP	IMF	DOC
+0.5	-2.1	+1.7	+21	+35	+48	+49	+7	+1.1	+30	+1.8	+0.0	-0.1	+0.0	+42

Accuracies: Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer: The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

A great Mandayen type bull to start this year's sale. This young sire is as long as a train and full of meat. On top of this he has a skin like a seal and a very quiet disposition. His numbers are also impressive with calving ease and high 200 and 400 day weight, as well as carcase numbers ticking all the boxes. Homo Polled.
